GAMES TOMORROW

National League.

Pittsburgh at Philadelphia.  
Cincinnati at New York.  
Chicago at Brooklyn.  
St. Louis at Boston.

Federal League.

Kansas City at Baltimore.  
St. Louis at Buffalo.  
Chicago at Pittsburgh.  
Indianapolis at Brooklyn.

American League.

Washington at St. Louis.  
Philadelphia at Detroit.  
New York at Chicago.  
Boston at Cleveland.

YESTERDAY'S RESULTS

National League.

Boston, 6; St. Louis, 3.  
New York, 8; Cincinnati, 1.

Phillies, 6; Pittsburgh, 2.

Brooklyn, 7; Chicago, 2.

American League.

St. Louis, 2; Chicago, 1; first game.

St. Louis, 3; Chicago, 1; second game.

Detroit, 8; Cleveland, 3.

Federal League.

Buffalo, 7; St. Louis, 3.  
Baltimore, 3; Kansas City, 2.  
Indianapolis, 2; Brooklyn, 6.  
Chicago, 7; Pittsburgh, 4.

## AUSTRALIA TAKING TO BASEBALL IN LIVELY STYLE

Most Encouraging Sign Is That School Teams Are Playing; Slang Employed in Newspaper Accounts of Games.

New York, Sept. 17.—Reports from Australia indicate that baseball is growing steadily in popularity. The game was greatly helped by the visit of the American professionals last year. Whereas ten years ago but two of the states of the commonwealth could boast teams, South Australia has joined New South Wales and Victoria in fostering the game. Base ball reports now figure in all the sporting pages of the leading newspapers in the three states, and what is more moment abounding teams are playing, which is a most hopeful sign. The game is played in Australia in the rainy season, and notwithstanding the air is often raw, the sky threatening and the diamonds muddy, the contests scheduled among the clubs in the various divisions, by means of which the players are ranked in skill, are carried out with enthusiasm.

A feature, also, of the accounts of the games in the newspapers is the emplacement by the writers of American baseball slang. But it is rather curious to note that a shout-out is called a "Chicago," which is word practically obsolete here. As indicating the hold that the American national pastime is gaining upon the Australian sporting world, there was an interstate baseball carnival in Sydney from August 1 to 8, and New South Wales, Victoria and South Australia competed against each other in numerous games between boy teams and between adult teams throughout the week.

BIRMINGHAM CLUB WINS PENNANT IN SOUTHERN LEAGUE

Atlanta, Ga., Sept. 17.—The Birmingham A.A. club of the Southern association won the pennant for the 1914 baseball season which ended today. Mobile finished second and New Orleans third.

## SWIFT RISE MARKS CAREER OF NEW TENNIS CHAMP

R. Norris Williams II. Not Yet 24; McLoughlin's Defeat One of Most Startling Upsets of Season.

New York, Sept. 17.—R. Norris Williams II, the new American singles tennis champion, whose sensational defeat of Maurice E. McLoughlin at the national tournament at Newport furnished one of the most startling upsets of the present sports season, has had a most meteoric rise in the court game. Born at Geneva, Switzerland, on January 29, 1891, of American parents, he is yet to celebrate his twenty-fourth birthday. Williams spent his boyhood in Europe and began to play tennis when he was 12 years old under the tuition of professional coaches. At 20 he had won several foreign championships and was noted as a player of much promise.

Hank O'Day more than has his hands full managing the Cubs and Heine Zimmerman.

When it comes time to hand out an auto to the player most valuable to a club, it might be well to consider Title Shafter and his defection from the Giants. Doubtless you can certify that T. Shafter's move was of great material aid, comfort and assistance to the Braves.

George Burns of the Giants, ranked as the greatest outfielder in the old league, may be converted into an infielder. McGraw has an army of outfielders, but he is weak at third base. And that is where Burns used to exert part of the time in the minors. McGraw feels that with Burns at third and Murray, Thorpe or Snodgrass in his place in the outfield, it would add somewhat to the batting strength of the club.

Bill Lindsay is dead. Had he been white we would be mourning as we would the loss of Walter Johnson. He was one of the five really great pitchers of the world.

The passing of Steve Yerkes, together with Stahl, O'Brien, Hall, Pape, Ball and Numamaker, makes seven of the Red Sox championship team of two years ago who have been released.

The new drafting plan of the American and National leagues will spike the guns of the Feds. According to present plans the big leagues will not divide the names of minor league stars taken into the majors until a 1915 contract is signed by them. This will make the Feds unable to profit by the work of the big league scouts.

Baseball showed no signs of dying when it came to the series between New York and the Boston Braves. The attendance figures were as phat as in the palmy days of old. But then, Hyacinth, baseball hasn't been all Brave-Giant series. To be sure.

John McGraw is a resourceful manager, but can even his colossal brain devise a way to win the pennant with Marty O'Toole on his staff? Not to mention Marquard?

One way to raise war revenue is to tax Ty Cobb and Heine Zimmerman for every fight they get into.

Star Princeton football player has jumped to a western college. Must have offered him shorter hours and more pay.

Major league draft is to be secret this year, but it is said that the owners will, in the end, take the players involved partly into their confidence.

J. Franklin Baker is one of the incorporators of a concern organized to deal in coins, gold and silver. In the past few years Mr. Baker has become a connoisseur on all sorts of coin, including World Series coins.

Complaints made of use of dumb-dumb bullets in big war. Complaints are also heard of the dumb-dumb plays in the baseball war.

## LINING 'EM OUT

MEAT CAUSE OF KIDNEY TROUBLE

Take Salts to Flush Kidneys & Back Hairs or Bladder Blisters.

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms uric acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken, then you suffer with a dull misery in the kidney region, sharp pain in the back or sick headache, dizziness, your stomach sour, tongue is coated and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush off the body's crimson waste, get four ounces of Jao Salts from any pharmacist here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithium, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in urine, so it longer irritates, thus ending bladder weakness.

Jao Salts is inexpensive; cannot injure, and makes a delightful effervescent lithium-water drink.

## "TIZ" FOR ACHING, SORE, TIRED FEET

Good-bye sore feet, burning feet, swollen feet, sweaty feet, smelling feet, tired feet.

Good-bye corns, callouses, bunions and raw spots. No more sine tightness, no more limping with pain or drawing up your face in agony.

"TIZ" is magical, acts right off.

"TIZ" draws out all the poisons excretions which puff up the feet.

Use "TIZ" and forget your foot misery.

Ah! how comfortable your feet feel. Get a 25 cent box of "TIZ" now at any drugstore or department store. Don't suffer. Have good feet, glad feet, feet that never swell, never hurt, never get tired. A year's feet comfort guaranteed or money refunded.

NEW MEXICO PLACED AMONG MICA PRODUCERS

One of the Seven States Which Has an Important Output of Product of Increasing Importance.

Washington, D. C., Sept. 17.—A

natural product of increasing importance is mica, the use of which is becoming more and more widespread as the number and variety of electrical applications increase.

Interest in this industry lies in the fact that it is not inflammable, is a non-conductor of electricity, and is very flexible and tough, which properties make it useful in a variety of ways for insulation purposes.

The exhibit of mica in the mineral technology division of the United States National Museum was made possible through the donation of the Westinghouse Electric company, which are extensive users of the material.

Though as yet incomplete this exhibit contains many good examples of mica, the crude state, the various stages of manufacture for industrial use and the finished product in its numerous forms of practical application.

The natives of India, one of the principal mica producing countries,

formerly used it in making superstitious amulets, concerning this mineral, among them the belief that mica was the

cause of lightning flashes, the work.

sparks of which were caught and preserved in the rocks. They also had great faith in its medicinal properties, believing that it would cure even the most deadly diseases.

Two varieties of mica only are used for industrial purposes, Muscovite or white mica and Phlogopite orumber mica. These varieties occur in pockets and veins near the surface of the earth, and are taken out by ordinary quarry methods, very little underground work being done.

The principal mica producing countries of the world are India, the United States, Canada, German East Africa and Brazil. In the United States the localities leading in its production are North Carolina, New Hampshire, South Dakota, Idaho, New Mexico, Colorado and Virginia.

After a section is blasted out it is hand sorted, the largest blocks going to the hand-sawing sheds, where

they are split to thicknesses from 1/16 to 1/2 inch, and the edges trimmed off square. After further splitting to about the thickness of heavy paper, it is then "sheet mica," and is shipped direct to the companies using that term. Sheet mica is chiefly used in the tanks of oil and other stoves, in lamp shades, spectacles, phonograph diaphragms, fuse plugs, electric light bulbs and windows in automobile tops. It is also used as a substitute for glass in factories, the windows of which are specially liable to breakage. Thin and irregular pieces of mica are split to a thickness of about 1/100 of an inch, placed on a steam table and painted with shellac. Other layers are added and painted until a thickness from 1/16 to 1/8 inch is reached, when the resulting plate is subjected to a pressure of several hundred tons, and ground in sand-paper rolls to the desired thickness. This is the "mica plate" used largely by the electrical manufacturing companies.

Pieces of raw material too small

even for making mica plate, are ground and serve many valuable uses when mixed with other substances.

Ground mica is used as an adulterant in rubber, paints, oils and axle greases, and as insulation.

The coarser mesh, with its property of non-conductivity, becomes useful when mixed with insulating compounds, as with hard rubber for telephone receivers. In wall paper and paints the ground mica gives the much desired sparkling effect.

The value of the production of sheet mica in the United States in 1913 reached the amount of \$435,000, while the imports totalled \$142,000.

Sheet mica is the most valuable form, the price per pound varying proportionately to the dimensions of the sheet. A sheet 1 by 10 inches may bring as much as 16 a pound if highly transparent, whereas the ground scrap mica sells for only \$20 to \$40 a ton, according to the variety and fineness.

All ELKS ARE EXPECTED AT THE THEATRE TONIGHT

All Elks are expected to report at the theatre tonight to be looked over by Joe Bren, the director of the minstrel show. Mr. Bren will deliver a talk.

A healthy man is a king in his own right; an unhealthy man is unhappy by slave. For impure blood and sluggish liver, use Burdock Blood Bitters. On the market \$5.00 a bottle.

Let the Herald want ad do your work.

## A Bank Account

It gives you a better standing in the community, especially among the business men, to be known as having "money in the bank." It strengthens one's credit. Besides, it is much more convenient to pay by check rather than in cash. Be wise, be provident, and open a bank account today. We offer you absolute security and the most convenient system of handling money.
